DECLARATION

on the use of generative artificial intelligence (AI) tools in the preparation of the manuscript

Manuscript title	
Authors

E-mail of the corresponding author	

On behalf of all authors, I confirm that during the preparation of the manuscript generative AI tools (mark one):

☐ were NOT used
☐ were used, as described below

If generative AI tools were used, please specify:

AI tool	Model / version (if known)	Purpose of use	Part of the manuscript
e.g. ChatGPT	*e.g. GPT-5 / unknown*	*e.g. language editing, translation, structuring the text, figures, data processing*	*e.g. Introduction; Fig. 2*

Routine spelling and grammar checking does not need to be declared. The use of generative AI must also be described in the Experimental part or in the Acknowledgements of the manuscript, indicating the tool and how it was used.

I confirm that:

- the use of AI tools was auxiliary and did not replace the authors' own work;
- all main results of the research, experiments, data analysis and conclusions were obtained by the authors;
- any content generated or suggested by AI tools was critically reviewed, verified, edited and adapted by the authors;
- all factual statements, numerical data, sources and references were checked by the authors;
- AI tools are not listed as authors or co-authors of the manuscript;
- no confidential or unpublished data of third parties were uploaded to AI tools.

The authors bear full responsibility for the content, accuracy and validity of the results, conclusions, text, figures, references and all other parts of the manuscript.

The use of AI tools complies with the policy of Methods and Objects of Chemical Analysis on the use of artificial intelligence (https://www.moca.net.ua/info/policies.html).
